

PDV SYSTEME
stressfreie IT

Freedom is a choice without any compulsion to choose and decide between different possibilities.

The reality in your everyday IT life looks mostly differently.

You must be aware of system failures, changed requirements as well as bottlenecks and you most likely have not a free mind, to deal with the subjects, which make your IT successful.

The future success of the company will de-

pend entirely on your IT in the age of Industry 4.0, digital transformation and cloud solutions.

„Change before you have to“.

In order for your mind to be free, we will improve the performance of your IT and make it stress-free. Such is the power from the outlet. And: We provide you with our know-how, to develop together the IT environment, that secures your company's success.

„We always want to be the first choice for our customers.“

Christian Daniel
Manager
PDV-Systeme GmbH

„We inspire our customers With stress-free IT.“

Andree Plumeier
Manager
PDV-Systeme GmbH

“ Our Mission Statement

We are confident that satisfied and enthusiastic employees are a precondition for highly satisfied customers.

In the interest of our customers they will act committed and responsible to realize pragmatic corporate objectives.

We inspire our customers with IT solutions which drive their business processes forward, that work without stress.

We always want to be the first choice partners for our customers

We are a team constantly evolving, are inquisitive and open to process innovations in tomorrow's IT solutions.

We take on new development dynamically and optimistically.

We pursue all successes consistently and therefore create the necessary economic conditions for satisfied employees and enthusiastic customers.

”

You have a great job.

Your IT is like a fast-paced city, it must function for its users, build new ones, maintain and cultivate old ones, modernize or dismantle the old, have the future in view, and guarantee security. Much of it at the same time and everything possible without affecting the processes of the users.

Congratulations. You have a great and responsible task! And with us a partner who knows your tasks, professionally supports you - from planning to implementation, monitoring and troubleshooting 24/7, including an end-of-life service beyond the manufacturer's service.

Consulting | For your planning with expertise

Consulting needs firstly experience, secondly expert knowledge, thirdly a talking culture of trust. We solve your strategic tasks for the physical (e.g., storage, backup, server), and intelligent IT components (e.g. virtualization software, applications) as well as networking. We create superordinate concepts for your IT strategy, tailored to your operating processes. Important parameter: Your investment must be justified!

Managed Services | For high availability

PDV managed services have two objectives: high availability of your IT and fast resolution of unpredictable problems. PDV Analytics is the appropriate early warning and diagnostic tool to identify sources of error and reduce system failures. PDV Instant Services ensure the fast resolution of hardware and software errors by qualified IT technicians.

IT solutions | For reliable operation

The success of IT solutions depends essentially on the skillful handling of complexity. This includes process understanding, technical know-how, the selection of IT components, professional project management as well as a goal-oriented co-operation. With this skill we realize challenging IT projects for industrial partners (eg chemicals, energy, food, Automation), service providers, commerce and the public sector.

OEM Solutions | So that your customers respect you

If you have, for example developed, a successful software or produced high-tech equipment for process technology? Today, the performance of these products depends to a large extent on the IT required for their application. With our OEM know-how and our manufacturing partners, you can increase the integration level of the IT components used, improve the performance of your products, and in many cases generate additional revenue.
